CONSTRUCTION AND DEMOLITION (C&D) OVERVIEW

Welcome to the City of Temple City, we would like to present you with an overview of the City's C&D program and answer any questions or concerns that you may have.

Assembly Bill 939, passed in 1989, mandates that all jurisdictions divert their waste from going to the landfill. Diverting C&D material from the landfill helps ensure the City is in compliance with AB 939, which requires that the City cut its refuse in half. The City's C&D program encompasses all construction debris, remodeling and tenant improvement within the city. This also includes *all* City sponsored projects as well. It is the City's goal that at least 60% of C&D be diverted from going to the landfill.

A list of acceptable certified locations that accepts the C&D is attached. Alternative C&D facilities may be utilized but must be pre-approved by the City's Recycling Coordinator. Costs may vary from location to location and it is advised that you call to get complete details. For additional locations please visit smart business recycling at the following link <http://dpw.lacounty.gov/epd/brtap/recyclingsite/index.cfm>

An encroachment permit from the Engineering Department will be needed for all public right of way issues.

All hazardous material must be properly disposed of. All pre-1970 buildings need to be surveyed by licensed inspector for hazardous materials.

For additional information, please call the Building Department at (626) 285-0488. If you prefer not to complete a waste management plan you may order a bin from Athens Services.

I/we agree to order a bin from the city's franchise hauler, Athens Services.

OR

I/we would like to request approval to self-haul as an exception to the requirement to use a solid waste collector franchised by the City. (Please complete attached Self Haul Application & waste management plan)

SELF HAUL APPLICATION

I/we would like to request approval to self-haul as an exception to the requirement to use a solid waste collector franchised by the City.

I/we agree that debris accumulated during the job process will be disposed using my/our company truck.

I/we agree that the residential trash bin will not be used in conjunction with this permit.

I/we agree to return the disposal site dump/gate receipt/ticket upon job completion to Building Department prior calling for final inspection. All documentation shall be in compliance with the approved waste management plan.
